FOUNDING PLAN • PAKISTAN • 12 MONTHS

Co-Living Matching Space Engine

12-step execution plan for a vetted shared-flat marketplace serving students & young professionals near Pakistan's business hubs.

Launch thesis and
Starting investment
PKR 24 lakh.

01 · EXECUTIVE SUMMARY

The first trust gap to close is housing.

Students and young professionals near Clifton, DHA, and PECHS waste weeks searching Facebook groups where 70% of listings are fake or outdated. This delay erodes trust, increases costs, and pushes renters toward unsafe offline options. The process is fragmented, unverified, and time-con-consuming for those relocating or starting fresh in the city.

Problem

- 70% fake listings on social platforms
- Weeks lost to unreliable searches
- No verification or safety for tenants

Solution

- Verified photos + secure chat messaging
- 87% compatibility score for better matches
- Trusted, verified listings for students & professionals

90-Day Goal

60 move-ins

12-Month Goal

900 move-ins

Funding Needed

PKR 24L now for MVP + verification

Source: PBS 1.96M students, internal survey 74% offline.

Who has problem, how painful, how big opportunity.

Out-of-city students struggle to find safe, reliable housing near campuses. Women make up 48% of enrollment but only 28% of hostel supply. 74% find housing offline through brokers, often unreliable. 40% exit early due to mismatch in location, cost, and safety. 70% of listings are fake or outdated, causing financial loss, stress, and wasted time, highlightg a large trust and supply gap in trust and supply gap in student housing.

03 · SOLUTION AND PRODUCT SCOPE

Verified listings + 87% match = low churn

Our platform uses an AI-powered fake photo detector to verify listings in real time, eliminating fraud. We calculate a compatibility score based on lifestyle, work hours, and clanliness to surface high-fit matches. Built-in secure chat enables safe coordination, while move-in support includes scheduling, documentation, and antonboarding help to ensure smooth handoff and low churn.

User Journey

Feature Roadmap & MVP Boundary

Feature Area	Phase 1 — MVP	Phase 2 — Scale
Listings & Verification	3 pilot units, 30 listings, AI photo verification	Expanded to 500+ listings, automated verification
Matching & Personalization	Compatibility score: lifestyle, work hours, clanliness	ML-optimized matching, habit learning
Communications & Support	Secure in-app chat, basic move-in checklist	Scheduling, reminders, 24/7 support
Scope Boundary	No owned properties. Partner-only supply.	Not building. Continue partner model only.

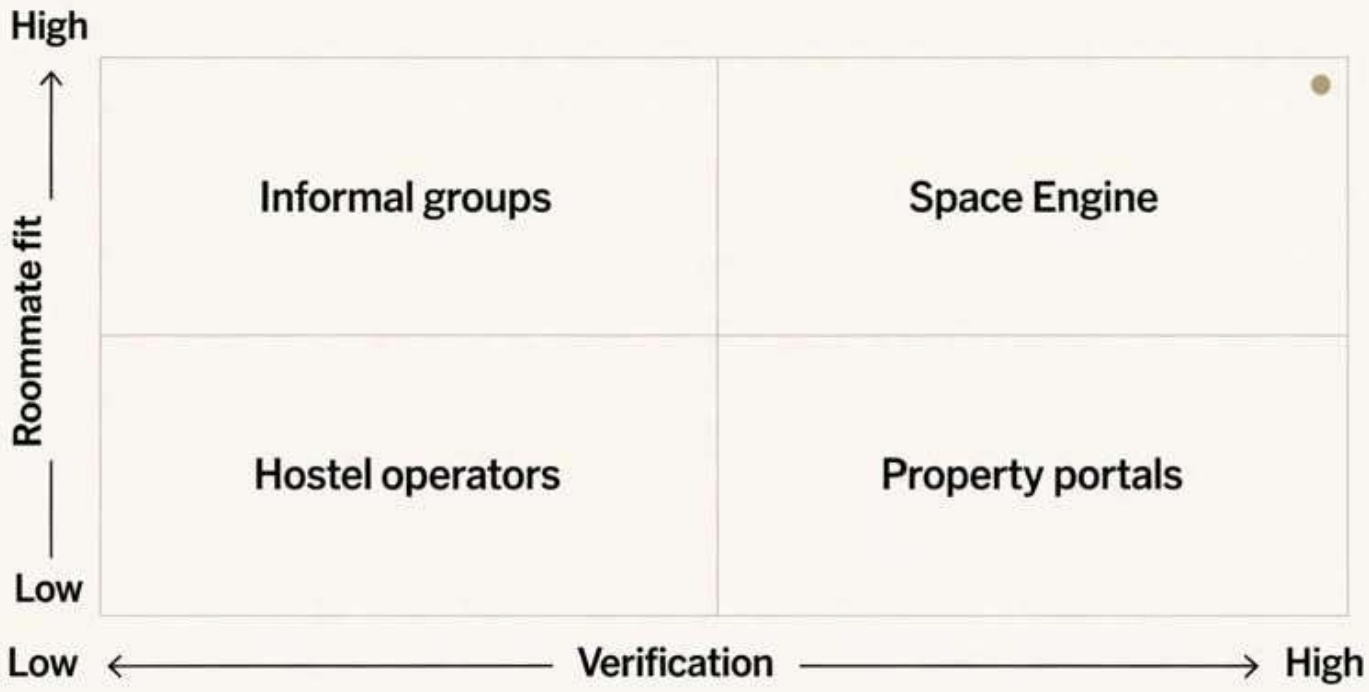

Scope focused on platform matchmaking only. No property ownership. Pilot limited to 3 partners and 30 verified listings.

High trust + high fit wins in dense corridors

Unlike competitors, existing options fall short on trust and fit. Facebook groups are informal with low verification and high risk of mismatches. Property portals like Zameen and OLX offer listings but are not designed for shared living or roommate compatibility. Hostel operators provide structure yet limit choice and location. Space Engine's advantage is focused density in Clifton, DHA, and PECHS combined with a women-safe layer, verified checks, and compatible roommate matching to build trust at scale.

Option	Verification	Roommate fit	Location depth	Weakness
Informal groups	Low	Low	High	Trust
Property portals	Medium	Low	High	Not shared
Hostel operators	High	Medium	Medium	Limited
Space Engine	High	High	Focused	Must build density

Positioning Matrix

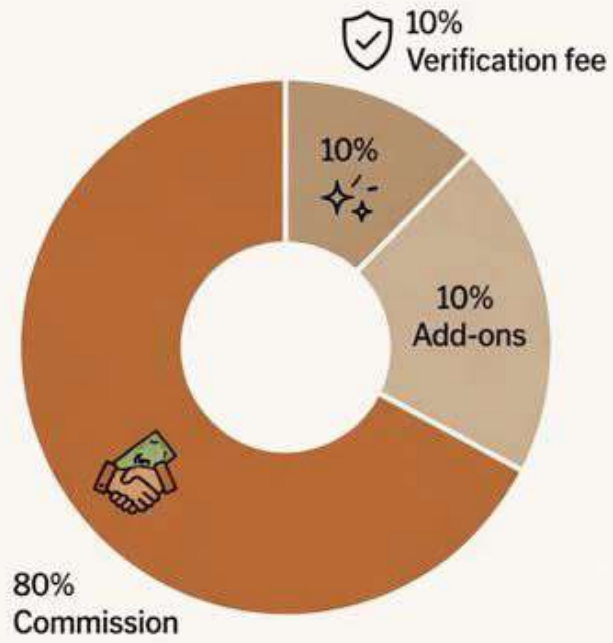

Analysis based on current local market offerings; Space Engine focused on safe, verified, community-driven shared living in target corridors.

Earn per move-in, keep CAC below contribution

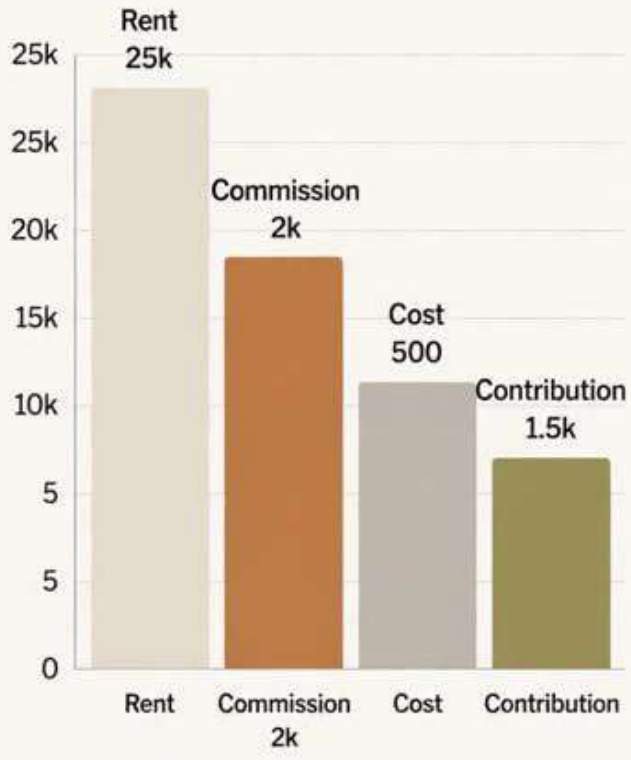

We earn 8% commission on each move-in at an average rent of 25,000 PKR, delivering 2,000 PKR contribution per booking. After a 500 PKR verification cost, net contribution is 1,500 PKR. Pricing ranges 18,000–25,000 PKR per bed monthly, covering Wi-Fi and cleaning. This keeps customer acquisition cost below contribution, ensuring sustainable growth while validated supply and demand scale profitably across markets.

Revenue stream

- Commission 80%
- Verification fee 10%
- Add-ons 10%

Unit economics (per move-in)

Contribution = Commission 2,000 PKR – Cost 500 PKR = 1,500 PKR

Assumptions are illustrative for planning. Contribution and costs are per single move-in. Pricing includes Wi-Fi & cleaning.

From 0 to 100 beds in 90 days with referral loop

Our go-to-market follows a tight funnel: Acquisition via university societies and student referrals drives awareness. Activation through verified property tours converts interest to intent. Monetization is achieved via move-in commission. Retention is secured by referral rewards and KOL women ambassadors, building trust. In three months we progress from 0 to 30 to 100 beds, proving demand and scaling sustainably.

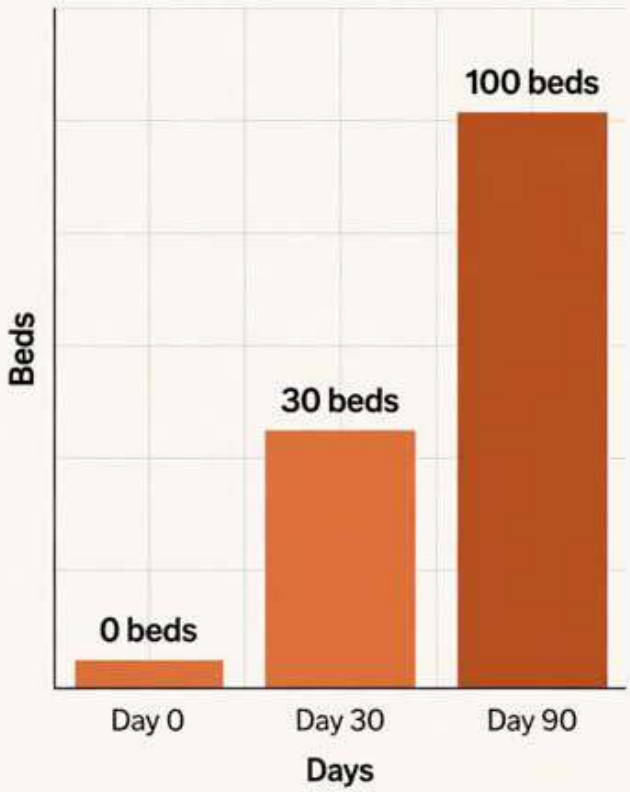

Funnel & Channels

Channels

- University: student societies, campus posters, society partnerships
- Referral: peer referrals, ambassadors, social share rewards
- Women-safe layer: KOL women ambassadors, safety verified tours, trusted hosts

Growth: Beds Onboarded (0–90 Days)

0 → 30 beds (Day 30) → 100 beds (Day 90)
steady growth via referral loop

Plan is illustrative. Assumes strong ambassador activation and referral incentives to drive sustained growth.

07 · OPERATIONS AND TEAM

Light team, heavy verification

Lean core team with defined roles focused on trust and verification. Daily verification SOP ensures quality with 2hr response time, and 4hr SLA for tour booking from request.

Team Roles

Founder / Supply Ops

- Partnerships & onboarding
- Supply growth targets
- Market expansion

Verification Lead

- Photo & ID verification
- Quality audits
- SOP compliance

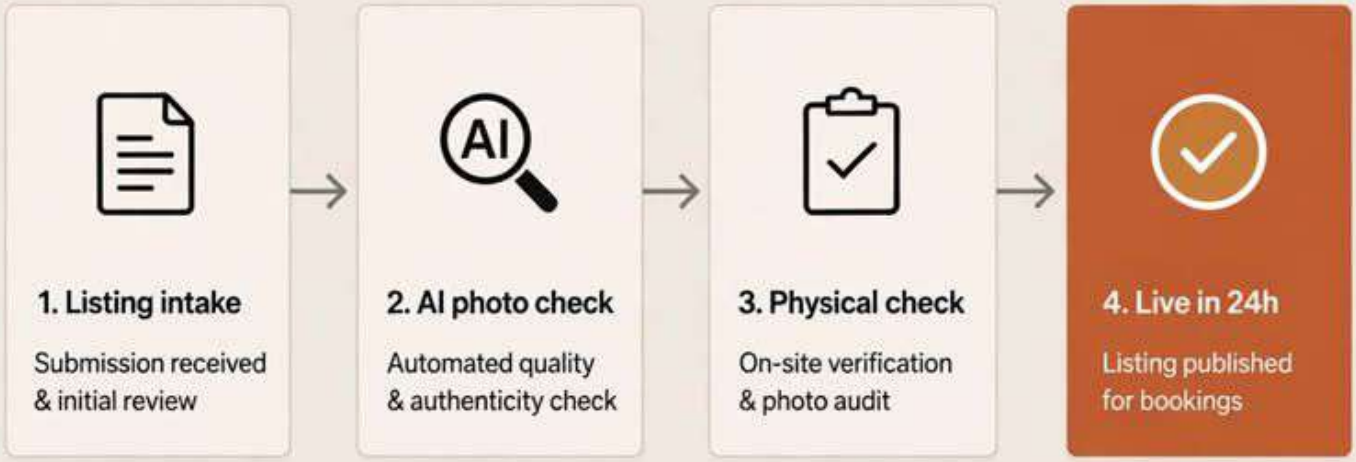

Community Growth Lead

- Demand channels & ambassadors
- Partner outreach
- Community support

Tech / Product Lead

- Platform & prototype development
- Data & matching systems
- Automation & reliability

Verification SOP — 4-Step Flow

Operations SLA: 2hr verification response · 4hr tour booking SLA from guest request. Designed for speed, accuracy, and trust.

Platform first, compliance by design.

PDPA consent is collected at signup. Tenancy agreements are between tenant and landlord — the platform is not a party to leases. GST is applied to platform commission where applicable. Safety verification and women-safe options are built-in across listings and hosts.

Risk	Impact	Mitigation
Fake listings	High	AI photo detector + physical check + re-audit
Safety	Low–Med	Verification SLA 2hr + trusted hosts
Supply churn	Med	Partner SLA 30 days + backup
Legal	Medium	User consent + standard agreements + data minimization

Disclaimer: The platform does not own properties. All tenancies are direct between tenant and landlord.

09 · DELIVERY GATES AND EXECUTION GATES

Ship in gated stages, validate with 100 beds

Progress through three gated stages. Each stage must meet metrics and verification checks before advancing to the next.

Stage 1

Day 0–30

Prototype

Metrics

- Beds: 0
- Verification SLA 2hr: <2hr
- CAC below 1500: <$1500
- Tour conversion 30%: 20%
- Referral 20%: 10%

Checklist

- Clickable prototype delivered
- Risk controls implemented
- Pilot partners signed

Stage 2

Day 31–60

Pilot

Metrics

- Beds: 30
- Verification SLA 2hr: <2hr
- CAC below 1500: <$1500
- Tour conversion 30%: 25%
- Referral 20%: 15%

Checklist

- Beta launched to verified users
- Matching data collected
- Support process validated

Stage 3

Day 61–90

Scale

Metrics

- Beds: 100
- Verification SLA 2hr: <2hr
- CAC below 1500: <$1500
- Tour conversion 30%: 30%
- Referral 20%: 20%

Checklist

- Scale to 100 beds operational
- Automation workflows live
- Referral program active

GATE CRITERIA • NO-GO CONDITION

- NO-GO if verification SLA fails — must maintain ≤2hr response time. Pause rollout and investigate before proceeding.
- Proceed only when all metric targets are met for the stage. Document decision and post-mortem before advancing.

Gated execution ensures quality, supply reliability, and controlled growth. Metrics are target benchmarks for 100-bed validation.

Profitable from month 2 with lean burn

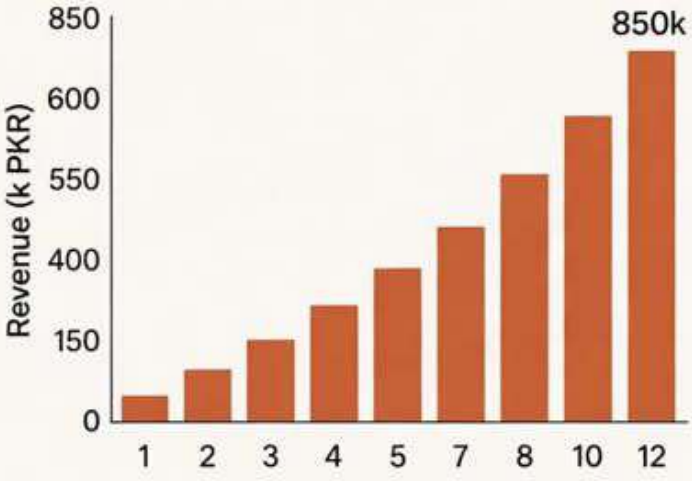

At 100 beds occupancy 85% contribution per bed 2000 PKR, monthly revenue 170k, opex 120k net 50k, Year 1 500 beds ARR 1M PKR MRR.

Monthly at 100 beds

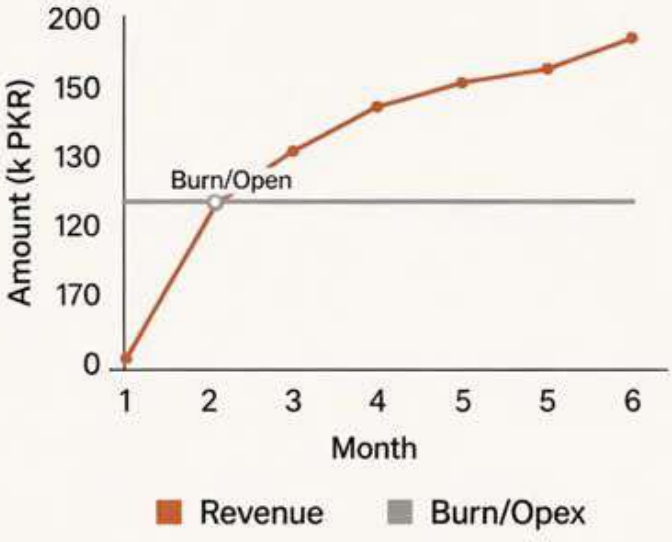

Metric	Amount (PKR)
Revenue	170k
Costs — Verification	42k
Costs — Marketing	30k
Costs — Ops	48k
Net Profit	**50k**

Assumptions: Occupancy 85% • CAC <1500 • Verification 500 per bed

12-Month Revenue Growth

Burn vs Revenue • Breakeven Month 2

Note: Year 1 target 500 beds • ARR 1M PKR MRR • Monthly contribution per bed 2000 PKR at 85% occupancy

What gets measured gets fixed.

Key performance indicators track product health from acquisition to revenue. These KPIs measure activation from first user interaction, 30-day retention to assess loyalty, customer acquisition cost and revenue per move-in to evaluate unit economics, supply verification for supply quality, and match success rate to ensure meaningful connections. Targets are set for 3 months (M3) and 12 months (M12) to guide growth, optimize spend, and ensure scalable operations that improve over time.

KPI Scorecard

Metric	Definition	Target M3	Target M12
Activation Rate	profile to first chat	35%	55%
Retention	30-day repeat visit	20%	45%
CAC	cost per move-in	PKR 2500	PKR 1200
Revenue per move-in	PKR 1800	PKR 2500	PKR 2500
Verified Listings	verified, live listings	30	150
Match Success Rate	successful match from first chat	25%	60%

Gauges Dashboard

Activation Rate
M3: 35% → Target 55%

Retention
M3: 20% → Target 45%

Match Success
M3: 25% → Target 60%

12 · NEXT ACTIONS

From plan to move-ins in 90 days

Starting tomorrow, execute the initial 90-day launch plan with focus on securing pilots, building the MVP and driving the first 60 move-ins. Align owner responsibilities, set clear deadlines, and establish measurable milestones. Track progress weekly, maintain light communication across teams, and document learnings to iterate quickly while ensuring safety, supply quality, and trust remain the foundation before scaling further.

#	Task	Owner	Date	check ✓
# 1	Secure 3 pilot co-living units near Clifton	DHA Ops Lead	Week 2	✓
# 2	Build MVP with verification + matching + chat	Product Tech	Month 1	✓
# 3	Onboard 30 verified listings with HD photos	Content Ops	Month 2	✓
# 4	Launch demand gen campaign FB Insta Uni partnerships	Marketing	Month 2	✓
# 5	Achieve first 60 move-ins	Growth	Month 3	✓
# 6	Implement NPS & safety review	Trust	Month 3	✓
# 7	Break-even validation 300 move-ins	Founder	Month 7	✓
# 8	Prepare Series Seed PKR 60L deck	Finance Legal	Month 10	✓

Rules:
- Keep 10-15 pages internal shorter deck for investors
- Put visuals only where they speed up understanding
- Write every number with source
- Treat as living doc — review monthly

13 · CONCLUSION

Verified trust, meaningful matches, scalable city by city.

Space Engine is not another listings portal; it solves real pain for students and young professionals in Karachi. By focusing on verified supply in Clifton, DHA, and PECHS, compatibility-based roommate matching, and a women-safe layer, we turn fragmented FB groups into a trusted product. With 60 move-ins in 90 days, CAC PKR 1200, revenue PKR 2500 per move-in, and a path to 150 verified listings in 12 months, the model is lean, profitable, and repeatable. From Karachi to Lahore and Islamabad.
